The Small Farm Outreach, Training and Technical Assistance Program provides outreach, training and technical assistance to small, limited-resource and socially disadvantaged farmers, ranchers and forest landowners in Virginia. The goal is to enhance farm incomes and improve quality of life for these farmers and their communities.

A holistic approach is applied in delivering programs to farmers and forest landowners - from financial and farm business planning to production and marketing. Services are provided, in collaboration with USDA and state agencies to farmers and communities through:

- Hands-on training
- Field days
- Workshops
- On-farm Demonstrations
- Conferences
- Fact sheets
- Publications
- Local media outlets
- Small group meetings
- One-on-one home / farm visits
- Farm and agriculture industry tours

"... Thank you to VSU Outreach and Technical Assistance staff, who gave time and knowledge to assist with presenting my application and its approval in reconstructing my Farm Ownership and Operating Loan from FSA to continue my efforts to maintain a viable farm."

—Patricia L. Carter, Farmer
